Introduction:

In this year's tcrypt, the questions will not only test your mathematical knowledge but also your ability to decipher a question using hint.

Platform:

A Microsoft form link will be shared in which questions will appear one by one. If the answer entered is incorrect, an error message will appear and you will not be able to move to the next question.

Hints to few of the questions will be provided on the discord server(it will be mentioned in the question whether hint will be provided or not). Hints will be uploaded one by one after every 1 hour. Hints can be in the form of a picture,link to a website or a youtube video.

There will be no teams or discord meeting for this event.

Duration and timings:

Like any other cryptic hunt, this year's hunt will last for 24 hours.

From 2pm on 13th October to 2pm on 14th October

Important points to be kept in mind:

1. no question has any error, all the answers have been verified.

2. you will have to enter a cryptic code in the form before starting the hunt.

Format of cryptic code : <first 3 letters of your name>_<class and section>

Example: pri_12-G

What if you are not able to complete all the questions?

suppose you are not able to complete all the questions within 24 hours then you are supposed to send screenshot of the last question you have attempted till 1:59pm on 14th as the form will be closed at 2pm. **If you don't send the screenshot, then you will be given 0 points. No excuses shall be entertained later.**

Example : A student has only attempted till question 5 then the screenshot should be like:

(this is just for example, not an actual question)

Link to submit screenshots:
